- Electronic interlocks
- Constant multiplication and division
- Optional roundoff
- Illuminated automatic decimal and punctuation
- 16-digit capacity

990 ELECTRONIC CALCULATOR

handles everything from addition to multi-step equations with ease

- Automatic Σx and Σx^2
- Square root
- Accumulates two separate totals simultaneously
- Item count
- Polarized light filter cancels glare
- Completely silent. Easy to operate. Calculates in milliseconds
- Optional roundoff
- Totally reliable integrated circuits
- Constant multiplication and division
- Illuminated automatic decimal and punctuation
- 16-digit display

570 PRINTING CALCULATOR

it's like two machines
for the price of one

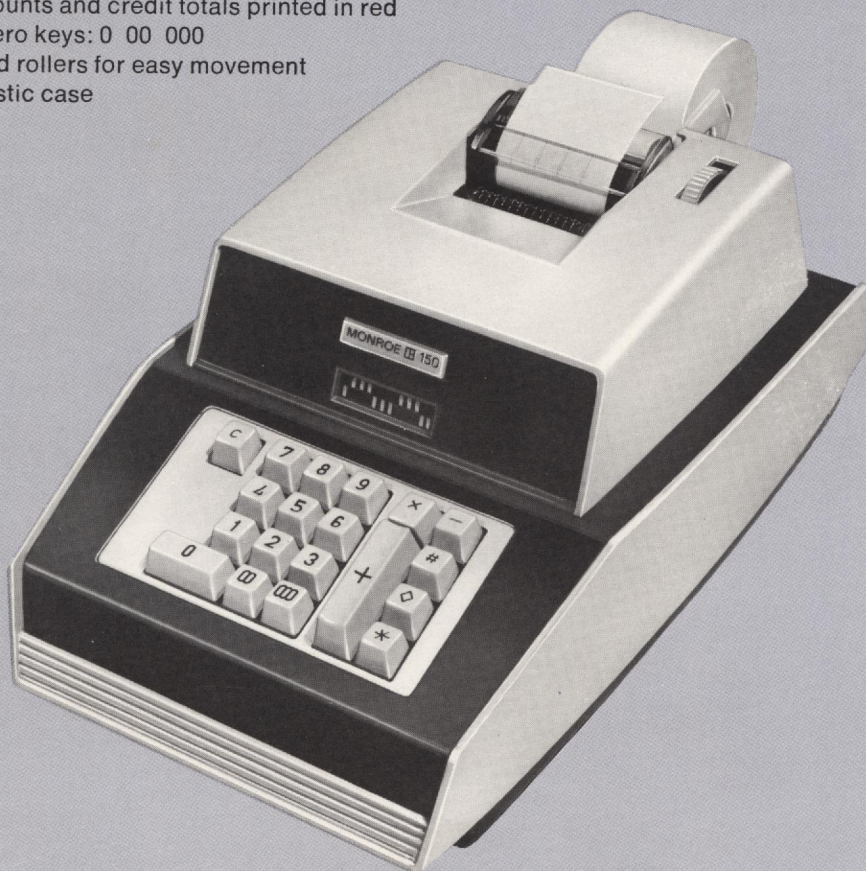

- A high-speed printing calculator *and* a ten-key adding machine
- Finds individual multiplication answers and their total
- Lets you multiply without disturbing addition totals
- Handles chain multiplication
- Prints division problems without meaningless zeros
- Automatically spaces after each answer
- Answers printed in red

150 ADDING MACHINE

everything you want in a ruggedly dependable adder

- Automatic credit balance
- 13-digit printout
- Repeat key makes multiplication smooth and fast
- Incorrect entries electrically erased
- Interlocks prevent depressing two keys simultaneously
- Automatic spacing of totals
- Minus amounts and credit totals printed in red
- Multiple zero keys: 0 00 000
- Handle and rollers for easy movement
- Tough plastic case
